

THE GAUNTLET

THE PROBLEM

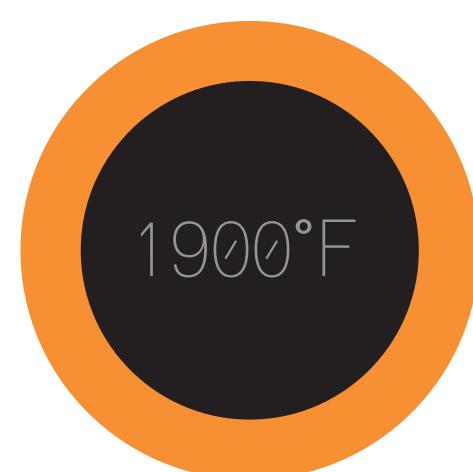

Blacksmiths have many needs that remain unaddressed, despite the centuries-old nature of the craft. Now, young smiths begin and promptly discontinue their pursuit of the art, discouraged by the **struggle** of overcoming the **steep learning curve**, while the older members desire to both pass down smithing to the younger generation and bring themselves **physically closer to their pieces**.

THE PRODUCT

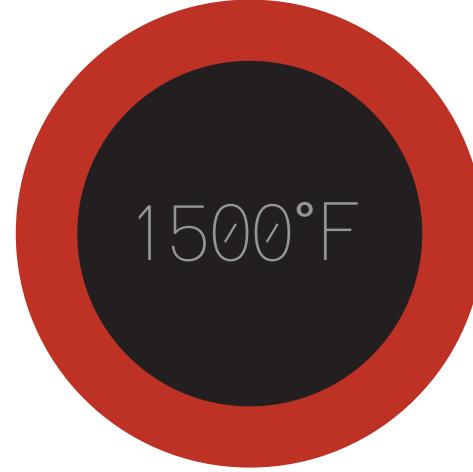

The Gauntlet is a highly **heat-resistant** glove that gives **instructive temperature feedback** and allows blacksmiths to have a **direct interaction** with their piece.

Flashing Yellow - Burn warning!
Solid Yellow - Desired temperature

Orange - Low desired temperature

Red - Too hot to handle

Green - Safe to handle

Interface Features and Specifications
-Tap to change from Fahrenheit to Celsius
-Remote wireless charging
